

Q-SPD

LAUNCHED 2005

PROWLER -Dive Boat

Length: 42ft
Displacement: 14,000kg
Power: 2 x Cummins 6CTA 8.3 350 Hp @ 2600 rpm
Drives: Q-SPD SD150
Propellers: Q-SPD 27" dia 4 Blade
Top Speed: 30 knots at full load

Prowler was refitted in Cairns, Australia, where the original stern drives and engines were removed and the Cummins engines and Q-SPD drives installed. The boat was then delivered under its own power to remote south east Papua New Guinea. The vessel carries 16 divers, 2 crew and all gear including 45 dive tanks and supports a dedicated dive resort. Reliability and simplicity were a major decider in the choice to use Q-SPD – the significant performance at all speeds was a bonus.
