

## PROWLER

### LAUNCHED 2005

**Length:** 42ft

**Displacement:** 14,000kg

**Power:** 2 x Cummins 6CTA  
8.3 350 Hp @ 2600 rpm

**Drives:** 2 x SD150

**Propellers:** 27" dia 4 Blade

**Top Speed:** 30 knots at full load

#### SUPPLIED BY Q-MARINE:

- Surface Drives
- TPropellers
- Drive shafts

Prowler was refitted in Cairns, Australia, where the original stern drives and engines were removed and the Cummins engines and Q-SPD drives installed. The boat was then delivered under its own power to remote south east Papua New Guinea. The vessel carries 16 divers, 2 crew and all gear including 45 dive tanks and supports a dedicated dive resort. Reliability and simplicity were a major decider in the choice to use QSPD – the significant performance at all speeds was a bonus.
